NEW-HAMPSHIRE,

A FRESHET .- On Wednesday and Thursday of last week, The Haverhall Republican says that an inches of rain-water felt to the surface, and the river Connecticut rose eight feet in so many hours. Much damage was caused by the flood sweeping away milt-dama and bridge, on the small streams.

DUTCHESS Co-On Wednesday afternoon, a gentleman cailed at The Tribune office in our absence from Poughkeepsie direct, and stated that the Whig State Ticket had 200 majority in that County, and that Alex. Coffin, (Whig) was elected to the Senate. We published accordingly in our last; but becoming distrustful of its accuracy, telegraphed toward evening to a Poughkeepsie friend for precise information, and received the following reply:

"H. GREELEY-The Loco-Foco Senator is elected. State Ticket in this County is over two bundred ahead. Now, as we had written mainly to learn which

State Ticket had the two hundred majority, the above is not quite so clear as we could have wished it. We apprehend, however, that it means the wrong State Ticket, and most reluctantly alter our table accordingly.

-What has got into Old Dutchess ! She may well be ashamed of such votes as she is acquiring the bad habit of giving; but, since the Official Canvass will bring them all to light, she might as well make a virtue of necessity and out with the whole truth.

The Philadelphia Daily News quotes the Lancaster Herald & Examiner as contradicting point blank our statement as a fact that Gov. Johnston carried several Congress Districts which last year chose Opposition Members of Congress.-We point our conjoint assailants to the VIIth (Chester) and XVIIIth (Fayette) as several' Districts that did just as we said, and we will thank The News to overhaul the returns from the Ist (Southwark) District and see if that is not in the same category. We have not the District by itself, but we feel confident that it gave Gov. Johnston a majority. But whether it did or not, our statement was cor

CITY ITEMS.

The performance of Lucrezia Borgia to-night, will be one of the greatest events in our operatic annals. Signor Benedetti, who has been in retirement for two years on account of an affection of his voice, has entirely recovered, and will appear in his great character Gennaro. Madame Pico, probably the best contralto in the country, will appear for the first time in some years, in the rôle of Orsino .-Steffanone represents Lucrezia, and Badiali is named as Alfonso. Under any circumstances, such an array of talent would warrant the earliest application for seats but when it is understood that this Opera cannot be given again during the season, it becomes ap parent that the house cannot hold by a thousand as many as will be anxious to be present.

The proceedings of the Aldermen last night were of no consequence. They adjourned until Monday next.

SINGULAR CIRCUMSTANCE .- We understand that two Hungarian officers feeling themselves personally injured by a letter abusing Kossuth generally, and especially with reference to his behavior on board the Mississippi at Marseilles, lately published in The Herald, proceeded to the office of that journal yesterday afternoon, and flung down their gloves before its editor, defying him to settle the matter by the duello, according to the principles of honor and of war. We believe the challenge was given verbally, but at any rate the challengers were its bearers. The challenged party peremptorily declined having any thing to do with such principles or practices, remarking in substance that he would see 'em dom'd first.'

Dr. Doane, Health Officer at the Quarantine, who met with a very serious accident a few weeks since and lay for nearly a month in per fect helplessness, we are glad to perceive ha far recovered as to get out of doors. His injuries consisted of the breaking of three or four of his ribs by a fall into the hold of a ship.

EXCURSION OF THE OMNIBUS LIGHT GUARD.-This large and spirited company, under command of Capt. H. W. Ryer, went to Bull's Ferry yesterday on their second annual target excursion and spent the day in an orderly and happy manner returning home at 6 o'clock. The company is com posed mainly of omnibus drivers and agents, a hardworking and too often abused class of citizens whom we have heretofore had occasion to defend from the unjust aspersions to which some of our cotemporaries seem to have a peculiar proclivity. Having deyesterday, and can testify to the good behavior, so briety and correct military deportment of every man The company was organized last year, and the fol-

Captain, H. W. Ryer; 1st Lieut. Patrick Smith; 2d, Francis Penfield, 3d, Moses Ryer, 4in, James Culloten; 5th, George Hudson, 6th, John Muler, 7th, Wesley Smith, 8th, Jacob Moore; Orderly Sergeant, Daniel Develin.

Under these officers yesterday they mustered over one hundred men (the largest company, we think, paraded this season,) in thorough uniform and equip ment. Dodworth's band furnished the music, and a large party of invited guests were present, among whom we noticed Chas. Miller, James T. Bertine. Enoch E. Camp, Alfred A. Phillips and others whose names have escaped us. As soon as they landed, the company proceeded to the target ground, where they fired a single shot each. The shooting was in many instances very superior, the winner of the first prize put the ball in the center of the bull's eye and many others came within honorable distance

The whole company then sat down to a good dinner, where an hour was spent in appeasing the appetite generated by the pure cool air of the river. On their return they marched down Canal-st. and Broadway, and through Fulton and Nassau homeward. We are indebted to the officers generally, and especially to Capt. Ryer and Lieux Patk. SIXTH-AVENUE RAILROAD .- The Company who undertook to construct the Sixth-avenue Railroad, have begun to fulfill their promise. Operations have been commenced at the corner of Church and Canal-sts.jand the concrete foundation is already laid for a short distance toward Wooster-st. It is possible that the read will be in running order as far as 20th-st. in four or five months, and it is said that will be completed within the year prescribed by the Common Council. It is proposed to use on this toad rail with only half inch shoulder, which it is thought will be sufficient to keep the cars on the track, going at the rate of five miles an hour, and which will tend to obviate the objection made to city railroads on the ground that they shatter the wheels of carriages crossing them.

WEIGHING GOLD DUST .- We observe that eards have been extensively circulated to the lower Wards of the City cautioning Californians and others against false weights and loaded scales, whereby a shave of 15 to 40 per cent. is gained by certain swindlers. It is further stated that persons

engaged in distributing these cards and naming the places where such swindling is practiced, have been threatened with personal violence if they per sisted in such work. It is only necessary to m tion these things to put those interested on their guard. Probably the best method for those having gold dust is to dispose of it at once to some respect able broker and get coin or bills therefor, instead of selling here and there a little, and offering the temptation for dishonesty in quarters where it would not naturally be resisted.

WASHINGTON CROSSING THE DELAWARE. -The Exhibition of this admirable picture continuce to attract crowds at the Stuyvesant Institute We state it as a gratifying fact of the progress taste for the fine arts has made during the last few years. The impression on our youth received from the sight of such a picture is incalculable, and we trust that our Schools will all be anxious to visit it, illustrating as it does one of the most thruling events in our history.

The excellent audiences which last winter so much enjoyed the Quartette Concerts of Mr. Eisfeldt, will learn with pleasure that he is about to repeat them this winter, with more thorough preparation and under better auspices. The series will consist of six concerts, including some of the best works of Hayda, Mozart, Beethoven, Mendelssohn, Spohr, Henselt and others. A choicer musical treat cannot be had than is here offered by Mr. Eisfeldt.

THE HERRICK REVENUE FRAUDS .- The United States District Attorney has received instructions from the Collector of the port, to institute proceedings for the condemnation of the goods seized in the stationery store of Mr. Herrick, for being falsely invoiced. A meeting of Pastors and Clergymen of different denominations was held on Monday, the 3d inst., at the Tract House, to take into consideration the condition of that portion of the population who are in the habitual neglect of public worship in this City and vicinity. STATEN ISLAND, -The Fair of the Richmond County Agricultural Society was held at Richmond on Friday. The number of persons, particuiarly of ladies, in attendance was very much large than last year, and the Exhibition generally much more extensive and interesting. The show of next Cattle was meager, but that of Horses, Swine and Poultry, large and fine. Of Flowers there was : most unexpected and (considering the lateness of the season) very remarkable and beautiful display Of Fruit, the quantity was small, and quality not generally commendable. The exhibition of Vegetables was exceedingly good, and in some particulars has not probably been equaled by any in the country. Some samples of Wine made from Grapes grown on the Island, four years old, was pronounced, by competent judges, superior to any American Wine yet offered to the public. It had a distinct and peculiar flavor, unlike any foreign Wine, but nearest a light flock. The best of it was sail to be a pure juice of the Muskadine Grape. The vineyard is at the Bull's Head, Port Richmond, owned by Mr. Merrill, and the vintage of 1847 is now in market.

The address, by Richard Adams Locke, Esq., was delivered in the Dutch Church, which was not of sufficient capacity to hold the audience that assembled, many being crowded out. After the address, there was a public dinner in the County Hall, at which speeches were made by several distinguished gentlemen. The occasion was generally observed as a holiday by the farmers, and the festivities continued until a tate hour at night. generally commendable. The exhibition of

A Committee was appointed by both sections, and it was agreed that the property should be sold at auction, and accordingly, on a Sunday, the auction sale took place, and both sections bought the property. The articles purchased by No. 1 were placed in charge of the planniff for safe-keeping, and the defendant, with several members of the original association (in the absence of the plaintiff) took away the property in question, and this action was brought to recover their value.

The defendant contended that by the articles of the original association, the property belonged to it as long as five magazers remained, that the plaintiff was not the owner and that the defendant did not take the primerty.

But when the narrative of the voyage was made public, and your long privations and dangers were revealed, a mingled feeting of admiration and sympathy pervaded us. The British portion of the population, as became them, participated in the sentiment more especially, and it was resolved by them to do sometimes that should them, to do something that should express the gratitude in some durable way. A medal was there fore struck in honor of the officers and crews, and

TEMPERANCE VOTE IN WILLIAMSBURGH. We understand that all the officers of this young city except the Mayor were on the Temperance ticket, and that a large majority of the Aldermen are well-known and pledged opponents of the rum traffic in any shape. This is indeed gratifying news, and we congratulate the people of the city and neighbor-hood upon the prospect of redeeming one spot within the shadow of the Great Metropolis from the fearful blight of intemperance. Should the people be able to give one year of strict temperance example, their criminal and pauper records would be invincible argument for eternal banishment of alcohol. hope that the active zeal of the friends of Temperance, which they have thus displayed at the polls. will not be suffered to abate, but that the warfare against rum and its legitimate fruits of pauperism and all manner of crime will not abate until the great destroyer is for ever overthrown. An extiting case was before the United States District Court his morning. The particulars are as follows: Lawrence Rebetock as Joseph Pock and George Pilliger. This is an action to recover damages for being deprived of his situation as a school teacher and organist in the German Holy Triaity Church, at the N. W. corner of Spruce and Sixthsis. The allegation is that the plaintiff was excommunicated, and therefore, by the rules of the Caurch, could not act as school teacher or organist. The defiator charges with propagating this story to the injury municated, and therefere, by the rules of the Church, could not act as school teacher or organist. The defisare charged with propagating this story to the injury of the pliff., and stating that pliff, was under that any which, according to the explanation, means, that he had lost his religious rights, and was not entitled to the prayers of the priests, or anything else connected with the religious ceremonies of the Catholic Church. It appeared, by the testimony, that the Bishop alone can excommunicate, but a priest can deny communion to any one who does not visit the confessional to make confession to the priest. Seven of the Trustees passed a resolution excluding the plaintiff from his situation as teacher and organist. This seemed to excite the feelings of the plaintiff, and it was testified to that he said, "If I could cut of the heads of the seven Trustees, I would walk laughingly to the gallows." Pliff, dealed being under the ban, and asserted that excommunication and inability to take the sacrament were two different things. He also signed a remonstrance to the Bishop against the transfer of the Church property to the Society of Jesus, and for this, it is alonged, the priest said, he would not give him the sacrament. This case is still under trial, and excite a great deal of interest and feeling in the German Catholic portion of our community.

DAY AND GOODYEAR.-The Editor of The Morristown Jerseyman, who was one of the pasof Juryman in the U. S. Circuit Court at the late September Term, speaking of the contributions to the Fair of the American Institute, from New-Jerser, he pays a merited compliment to the specimens of India Rubber goods from the establishment of Mr. Day, and closes his notice thus:

Mr. Day, and closes his notice thus:

"The India Rubber suits have become questions of general interest and when its known that through the eaterprise of Mr. Day, the prices of India Rubber goods have been reduced 25 per cent, which still leaves a broad margin for profit, the secret of the opposition and persecutive he has met with from the combined India Rubber Companes will be better understood.

"We confest that we have no sympathy with one wherels an in-entor of his reward, but when at the last term of the U. S. Circuit. Court at Trenton, we heard Mr. Day boildly challenge the Goodyser party to a treal upon the merits before a jury, and when that challengs was declared, the natural conclusion was, that there was something every gwith a party who, after making so great a demonstration, feared to come to trial."

Rubber manufacturers, and in giving place to the opinion of Col. Hull, of The Jerseyman, we do not wish to be considered as committing The Tribune to either side in this controversy.

PATENT FLAX PULLER.—The only really new thing we saw at the late Pair was a model of a machine invented by S. B. Goss, of Newark, in this county, for harvesting Plax. It seemed so simple in county, for harvesting Fiax. It seemed so simple in its arrangement, and so easily comprehended, as to leave scarcely a chance to doubt that it must work to the satisfaction of the ingenious inventor. If it meets his expectations, it will pull fiax as fast as a lorse-power Reaper can cut grain—say 20 acres per day, and do it in the most perfect manner. This invention comes opportunely with the late wonderfor discoverices in preparing the flax fiber for manufactories, and those who can retnember the backaching work of flax pulling, will call him blessed. We shall watch the progress of this machine with interest.
